Bidders are required to propose solutions as specified in the design. Bidders are required to propose all items and are wholly responsible for all products and implementation offered unless otherwise specified and as specified in the terms and conditions.

The successful Bidder shall be the Contractor for all the products and implementation services offered and are fully responsible for the overall project management and co-ordination of the supply, installation, integration, testing, commissioning and maintenance for the above-mentioned project. The scope of the bid includes design, specification, bill of quantity and prices of the items as detailed in this document and any other items that deem necessary but not mentioned in this document.

1.2 Bidder’s qualification

The bidder should have experience of design, supply, delivery, install, test, commission and maintain Manage Engine and Microsoft Solution for at least Three Financial Institute. Vendor should provide the following details and documents:

- a) Microsoft (Gold) Partner certificate.
- b) At least 5 (Five) Vendor Certified Professional exist as regular employees.
- c) Valid Trade License, TIN Certificate, VAT registration certificate.
- d) Original brochures with technical specification of the product quoted.
- e) Other license certificates as may be applicable.
- f) Company local address and contact numbers.
- g) Name, designation, qualifications and experience of the technical and management Personnel to be engaged with this project.
- h) Provide a list of similar deployment reference in Bangladesh mentioning e-mail and telephone number.

1.3 Deliverables

The deliverables of this project include the following:

- a. Microsoft Windows 10 Professional OS License.
- b. Manage Engine AD Audit Plus and Manage Engine Self Service Plus License.
- c. Local Administrator Password Solution (LAPS) Service tools with required license
- d. Documentation of deployment and monitoring documents.
- e. Training materials.

1.4 Bid prices

Bidders shall quote in Bangladeshi Taka (BDT) for the items quoted including VAT & Tax, AIT etc. The price will include supply, installation and maintenance of the quoted systems.

1.5 Deadline of bid

The bidder must submit the bids to SIBL Head Office as per time and date given in the first page of this document.

1.6 SIBL's right to accept any bid and to reject any or all bids

SIBL reserves the right to accept or reject any bid, and to annul the bidding process and reject all bids at any time prior to award of Contract, without thereby incurring any liability to the affected bidder or bidders or any obligation to inform the affected bidder or bidders of the grounds for the SIBL's action.

1.7 Submission of Bill and Payments:

Until otherwise stated the following procedure must be followed by the vendors:

- The vendor will submit the following documents along with their bills/invoices for payment from the Accounts:
 - i. A copy of the Work Order
 - ii. If applicable, a copy of User Acceptance Test (UAT) duly signed by the Head of ICT Division.
 - iii. An original Challan duly signed by authorized officer
- If the performance security money is not deposited separately in the form of Bank Guarantee or Payment Order, performance security money will be deducted from the bill.
- Applicable VAT & Taxes will be collected from the bill.
- The rest bill would be paid in due course after pre-audit.

1.8 Submission of bid documents:

The bidder shall deliver the technical proposal bound, sealed and labeled as "Technical Proposal". The Financial proposal should be provided in a separate sealed envelope and labeled as "Financial Proposal". Please provide brochures of proposed item. Both the proposals shall be enveloped in 3rd envelope duly sealed labeled properly.

1.9 Opening of Technical & Financial proposal:

The proposals submitted against the subject RFP will be opened on the date and time specified in the first page of this document in front of the purchase committee of Social Islami Bank Limited. 1. Manage Engine AD Audit Plus

Feature	Requirements	Compliance (Yes/No)	Comments
Brand	Please Specify		
Model/version	Please Specify		
Country of Origin	Please Specify		
Solution Summary	The solution must provide Active Directory Monitoring Reports.		
	The solution must Initiate AD security audits, critical changes including creation, deletion, permission, and other changes made to AD users, groups, OUs, computers, and other AD objects in real time.		
	The solution must provide network security by keeping track of all changes made to critical Group Policy Object (GPO) settings such as password, account lockout, user rights assignment, and other policies.		
	The solution must provide Countermeasures to handle lockouts, by auditing and diagnosing the source of stale credentials, such as improper drive mappings, scheduled tasks, applications, services, and more.		
	The solution must provide ability to Monitor employee login activity by Analyzing workforce productivity by auditing login and logoff data, including details on who is logging on, when, and for how long.		
	The solution must Track and review actions by specific high-privileged user accounts or admin groups for unwarranted AD changes, and spot instances of privilege abuse.		
	The solution must Trigger instant email/SMS notifications when unsafe user actions are detected, such as multiple changes to AD schema, FSMO roles, domain-level permission changes, and more.		
	The solution must Review and remediate security threats such as insider threats with predefined, automated responses that can shut down the rogue employee's system and disconnect their user session.		
	The solution must Improve employee productivity with real-time monitoring tools.		
	The solution must Reinforce holistic security around Active Directory with continuous monitoring and reporting on all critical changes made to AD objects and their attributes, Group Policy, and more.		
	The solution must support Tracking and investigating of sudden permission changes at the domain, OU, GPO, group, computer, and user levels along with the old and new access-control list (ACL) values.		

	The Solution must Generate instant notifications when critical user accounts are locked out with details such as locked out time, machine, and more.		
	The Solution should Audit account lockouts, view their statuses, and check for stale credentials in services, applications, and scheduled tasks.		
	Must provide GUI based management from single console as well as support remote management.		
	Must Detect insider threats by monitoring AD accounts for an unusual time or volume of lockouts using user behavior analytics (UBA).		
	Must be able to Mitigate brute force attacks using automated threat response to disconnect rogue users' machines from your network.		
	Must be able to Find frequently locked out users within your AD environment over different periods to root out negligent users.		
	Must Support Speed up forensic investigations by Analyzing and reporting on all account lockout and unlock events to generate clear, concise audit records as legal evidence.		
	Must provide Real-Time DNS Changes Audit Reports.		
	The solution must have Real-Time Schema, Configuration & Site Changes Audit Reports.		
	Ability to have Real-Time Containers & Contacts Changes Audit Reports.		
	Ability to Know the before and after values for all changed attributes including critical ones such as type and scope attributes.		
	Ability to View the history of changes for any groups including important ones like AD's built-in privileged groups and other sensitive groups.		
	Ability to Track the creation, deletion, renaming, and movement of all groups. Know who made what change, to which group, and when.		
Edition	Professional

2. Manage Engine Self-Service Plus

Feature	Requirements	Compliance (Yes/No)	Comments
Brand	Please Specify		
Model/version:	Please Specify		
Country of Origin:	Please Specify		
Solution Summary	Must provide the ability to Allow users to reset and change their domain passwords in Windows Active Directory on their own.		
	The Solution Must Let domain users self-unlock their Windows Active Directory account without IT assistance.		
	The Solution Must Remind users of their upcoming Active Directory password expiration date via email, SMS, and push notifications.		
	The Solution Must Remind users of their upcoming Active Directory password expiration date via email, SMS, and push notifications.		
	The Solution Must be able to Enforce fine-grained password policies for Active Directory that includes a password dictionary filter, a pattern checker, and more.		
	The Solution Must Provide users access to password self-service from the login prompts of Windows, macOS, Linux, Outlook Web Access, etc. ..		
	The Solution Must Allow users to force update their forgotten Active Directory cached credentials with self-service password reset.		
	The Solution Must be able to Secure Windows, macOS, and Linux logons with multi-factor authentication (MFA) for remote and local access to network resources.		
	The Solution Should be able to Secure VPN connections to your organizations' network and resources with multi-factor authentication (MFA).		
	The Solution Must provide Automate access control decisions, like enforcing MFA for login and SSO, based on parameters like IP address, device, business hours, or geolocation.		
	The Solution Must Secure password reset and account unlock attempts with multi-factor authentication.		
	The Solution Must be able to Enforce two-factor authentication for every Windows logon, including both remote and local logons, for improved security.		
The Solution Must provide Scouts for forgotten or expired passwords and locked out accounts, and schedules automated password resets and account unlocks.			

	The Solution Must Ensure IT security by helping admins generate, schedule, and export audit reports as well as reports on password status.		
	The Solution Must provide Mobile app to help users manage their Passwords from anywhere.		
	The Solution Must Offer a secure portal through which end users can self-update their Active Directory profile information.		
	The Solution Must Provide a self-service employee search tool that helps end users find their colleagues' Active Directory profile information.		
	The Solution Must Display a detailed organization chart that helps end users find coworkers' reporting staff and direct reports.		
	The Solution Must provide the functionality to Manage Active Directory user profiles by forcing users to update their information when they log in to the user portal.		
	The Solution Must options to Enforce granular password policies across Windows Active Directory and cloud applications.

3. Local Administrator Password Solution (LAPS)

Feature	Requirements	Compliance (Yes/No)	Comments
Brand	Please Specify		
Model/version:	Please Specify		
Country of Origin:	Please Specify		
Solution Summary	Solution is required to be resistant against tampering with by user of the computer it is implemented on, even if the user of the computer is member of local Administrators group		
	Solution must be centrally manageable.		
	Ability to know the password for certain computer without the need to directly touch it, either locally, or remotely		
	Ability to install, update and uninstall the solution in unattended way and on many computers at the same time		
	Solution must support built-in or custom (other than built-in) local administrator account		
	Solution must be able to handle the scenario when built-in Administrator account is renamed, without the knowledge of the new name		
	Solution must be able to correctly handle the situation when computer is disconnected from corporate network, i.e. not to change the password when it is not possible to report it to the password repository		
	Solution must support x86 and amd64 hardware platforms		
	Solution must contain simple to use tool for retrieval of password for administrator account on given computer		
	In default configuration, solution must not show any traces of activity on the computer it is installed on – it must be hidden from user as much as possible		
	When configured by an administrator, solution must provide with logging of its activity		
	Solution must generate unique random password of managed local Administrator account for every managed computer		
	Generated passwords must fulfil the following complexity requirements:		
	Password must be 12 characters long by default		
Password length must be configurable by the administrator of the solution to allow longer password length if required			

	Password complexity must be configurable. Most complex password must contain at least 1 character from each of the character groups like Capital letters, Small letters, Numbers, Special characters.		
	Maximum age of password must be configurable with default of 30 days. After this time, solution must automatically change the password to new value		
	Above mentioned values shall be considered as default and should be configurable		
	Solution must allow only authorized personnel to know the password Administrator account for particular computer		
	Solution must allow for granular access control for reading the password, on per-workstation basis		
	Solution must support changing the password of Administrator account on demand, without the need to directly touch the workstation either locally or remotely, so it is possible to force password change when necessary, before password gets automatically changed because of its age		
	It must be possible to plan the password expiration on per-workstation basis, to support scenarios such as "Password is set to expire today at midnight"		
	Solution must allow for auditing of password reads from password repository		
	The Solution Must Support Resistance against tampering with from the side of user of the computer.		
	The Solution Must Provide privileged security context for local execution.		
	The Solution Must Provide security context for network operations.		
	The Solution Must Support Automatic timing of operations feature like password management should be performed every time GPO refresh event occurs on the computer		
	The Solution Must Support Automatic detection of offline state.		
	The Solution Must Support Scalability, The solution should touch every managed computer across the AD network.		

4. Training

The Bidder must provide necessary training to SIBL IT personnel on deployed products. This training will be done after implementation phase of Solution products. Ten (10) IT personnel of the SIBL will be involved. Training must be arranged with Microsoft learning partner must provide official courseware.
